Forecast For The United Kingdom
Issued by Met Office Exeter
at 0400 on Wednesday 23 Jun 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cloudy with some rain northwest. Fine and dry southeast.

Today:
Cloudy in the north with mostly light rain for parts of north Wales, northern England, Northern Ireland and Scotland. Brighter, dry and warmer across the rest of Wales and England.

Tonight:
Staying mostly cloudy in the west and northwest with mostly light rain at times. Clear spells in the southeast where chilly again with a few fog patches possible.

Thursday:
Cloudy for most with some rain and drizzle at times. Heavier rain likely across the northwest during the day. Mostly dry east Scotland and east England where warm.

Outlook for Friday to Sunday:
Rather cloudy with areas of rain and showers sinking south. These could be heavy, especially in the south. Drier, settled weather gradually moving in from the north. Temperatures around average.
